Open the file(s) you would like to share on the desktop in advance,
and click “Share Screen” to select and share your file(s).

Tips for the virtual session

- Whether you have previously installed the zoom client or not, please download the zoom conference premium client from <https://www.zoom.us/download> anyway. This is key to the functioning of interpretation during the conference. After downloading and installing the client, please check if the interpretation option is available once the function is activated by the host.
- For speakers, please log in with your PC and use headphones to ensure good audio quality.
- For the convenience of the host, please change your name to “Name-Company/Department” .
- Simultaneous interpretation is provided for this forum. You can select the language you would like to listen to by clicking “interpretation” on the control panel of the conference/webinar. For speakers, please make sure that you select the same language for interpretation as the one you will give the speech in. For example, choose “Chinese” if you are a Chinese speaker, or “English” if you are an English speaker.
- All participants are muted by default. If you are a speaker, please unmute yourself when you speak. If you are not, please mute yourself and turn off your camera.
- There are two video layouts: Active Speaker View and Gallery View. The former shows only the active speaker on the largest screen by default, while the latter shows all speakers. You can choose either view to your own preference.
- Should you have any questions, you can use the “chat” function to raise them.
- Please make sure you are connected to a stable and smooth Wi-Fi network, or 4G or Ethernet if available. Please connect your device to a charger in case your device runs out of battery.
